SUBJECT INDEX

Adenosine
Effect of central adenosine on brainstem blood flow in fetal sheep. **80**, 141, 1995
Adrenal
Impact of gestational age on the catecholamine responses of the fetal sheep adrenal to cholinergic stimulation *in vitro*. **80**, 767, 1995
Afferent nerve fibre
Reflex respiratory responses to continuous and intermittent stimulation of afferent fibres from muscles in cats. **80**, 103, 1995
Albumin
Composition and viscosity of interstitial fluid of rabbits. **80**, 203, 1995
Albuminuria
Resistance to glomerular injury in the diabetic BioBreeding rat. **80**, 991, 1995
Amino acid transport
Insulin stimulates cationic amino acid transport activity in the isolated perfused rat pancreas. **80**, 745, 1995
Angiotensin II antagonist
Haemodynamic responses to an angiotensin II receptor antagonist (GR117289) in maternal and fetal sheep. **80**, 285, 1995
Arginine
Biphasic L-arginine uptake by the isolated guinea-pig heart. **80**, 969, 1995
Arthritis
Prolonged alteration of vasoconstrictor and vasodilator responses in rat knee joints by adjuvant monoarthritis. **80**, 349, 1995
ATP-sensitive K^+ channel
Glibenclamide, a blocker of ATP-sensitive potassium channels, reverses endotoxin-induced hypotension in pig. **80**, 167, 1995
Atrial natriuretic peptide (ANP)
Renal, endocrine and vascular effects of atrial natriuretic peptide in a novel vasopressin-deficient genetically hypertensive strain of rat. **80**, 275, 1995
Atrial receptor
Primary neural involvement in renal haemodynamic and functional responses to prolonged stimulation of atrial receptors in anaesthetized dogs. **80**, 631, 1995
Attention
The effects of attentional factors on an inhibitory jaw reflex in man. **80**, 299, 1995
Autoregulation
The effect of experimental hypertension on retinal vascular autoregulation in humans: a mechanism for the progression of diabetic retinopathy. **80**, 53, 1995
Blood–brain barrier
The nature of increased blood–cerebrospinal fluid barrier exchange during CO_2 inhalation in newborn and adult rats. **80**, 117, 1995
Penetration of small molecular weight substances through cultured bovine brain capillary endothelial cell monolayers: the early effects of cyclic adenosine 3′,5′-monophosphate. **80**, 675, 1995
Cerebral microvascular permeability and CSF pH in anaesthetized rats. **80**, 1053, 1995
Blood flow
Neuropeptidergic and autonomic control of the vasculature of the rat knee joint revealed by laser Doppler perfusion imaging. **80**, 341, 1995
Prolonged alteration of vasoconstrictor and vasodilator responses in rat knee joints by adjuvant monoarthritis. **80**, 349, 1995
Blood pressure
Renal, endocrine and vascular effects of atrial natriuretic peptide in a novel vasopressin-deficient genetically hypertensive strain of rat. **80**, 275, 1995
Haemodynamic responses to an angiotensin II receptor antagonist (GR117289) in maternal and fetal sheep. **80**, 285, 1995

Brainstem
Effect of central adenosine on brainstem blood flow in fetal sheep. **80**, 141, 1995

Calcitonin
Effect of calcitonin, elevated calcium and extracellular matrices on superoxide anion production by rat osteoclasts. **80**, 713, 1995

Calcium
Contribution of extracellular calcium to intracellular pH-induced changes in spontaneous force of rat portal vein. **80**, 69, 1995
Interactions between oxoglutarate oxidation and acid secretion in isolated rabbit gastric glands. **80**, 441, 1995
EB 1089, a calcitriol analogue, decreases fetal calcium content when injected into pregnant rats. **80**, 449, 1995
The effect of mechanical loading on the response of rat ventricular myocytes to acidosis. **80**, 701, 1995

Calcium channel
The G. L. Brown Prize Lecture. Voltage-dependent calcium channels and their modulation by neurotransmitters and G proteins. **80**, 1, 1995
Ca^{2+} release channels in rat denervated skeletal muscles. **80**, 561, 1995

Calcium current
Activity-induced facilitation of L-type Ca^{2+} current in cardiomyocytes isolated from guinea-pig ventricles. **80**, 391, 1995
Muscarinic suppression of Ca^{2+} current in smooth muscle cells of the guinea-pig urinary bladder. **80**, 575, 1995

Calcium-activated chloride channel
Ca^{2+}-activated Cl^- and K^+ channels and their modulation by endothelin-1 in rat pulmonary arterial smooth muscle cells. **80**, 815, 1995

Calcium-activated potassium channel
Ca^{2+}-activated Cl^- and K^+ channels and their modulation by endothelin-1 in rat pulmonary arterial smooth muscle cells. **80**, 815, 1995

Calcium uptake
Intestinal calcium transport in mole-rats (*Cryptomys damarensis* and *Heterocephalus glaber*) is independent of both genomic and non-genomic vitamin D mediation. **80**, 597, 1995

Carbachol
Muscarinic suppression of Ca^{2+} current in smooth muscle cells of the guinea-pig urinary bladder. **80**, 575, 1995

Carbon dioxide
The nature of increased blood–cerebrospinal fluid barrier exchange during CO_2 inhalation in newborn and adult rats. **80**, 117, 1995

Cardiac myocyte
Influence of stretch on excitation threshold of single frog ventricular cells. **80**, 221, 1995
The effect of mechanical loading on the response of rat ventricular myocytes to acidosis. **80**, 701, 1995
The voltage dependence of contraction at different stimulation rates in guinea-pig ventricular myocytes. **80**, 941, 1995

Cardiovascular function
The mechanism of relaxation in response to magnesium by the aorta of pregnant rats with salt-induced hypertension. **80**, 79, 1995

Cardiovascular response
The cardiovascular responses to feeding in man. **80**, 683, 1995

Catecholamine
Sympathoadrenal and other endocrine and metabolic responses to hypoglycaemia in the fetal foal during late gestation. **80**, 651, 1995
Impact of gestational age on the catecholamine responses of the fetal sheep adrenal to cholinergic stimulation *in vitro*. **80**, 767, 1995
Cold-induced changes in circulating levels of catecholamines and thyroid hormones are modulated by energy intake in newborn pigs. **80**, 877, 1995

Cell culture
Properties of an identified dopamine-containing neurone in culture from the snail *Helisoma*. **80**, 37, 1995

Cerebrospinal fluid
The nature of increased blood–cerebrospinal fluid barrier exchange during CO_2 inhalation in newborn and adult rats. **80**, 117, 1995
Cerebral microvascular permeability and CSF pH in anaesthetized rats. **80**, 1053, 1995

Chicken
Intracellular pH regulation in chicken enterocytes: the importance of extracellular pH. **80**, 1001, 1995

Chloride channel
Swelling-activated conductances for chloride, potassium and amino acids in the rat colon: a whole-cell study. **80**, 411, 1995

Chloride current
Chloride current activated by hypotonicity in cultured human astrocytoma cells. **80**, 373, 1995

Cholecystokinin
Control of gastric emptying in the pig: influence of cholecystokinin, somatostatin and prokinetic agents. **80**, 159, 1995
Rat pancreas after long-term treatment with the somatostatin analogue octreotide. **80**, 1031, 1995

Circulation
Cardiovascular responses to heat stress in late gestation fetal sheep. **80**, 755, 1995

Cirrhosis
The endothelial and non-endothelial mechanism responsible for attenuated vasoconstriction in cirrhotic rats. **80**, 609, 1995

Colloid osmotic pressure
Composition and viscosity of interstitial fluid of rabbits. **80**, 203, 1995
Contraction
Contractile activation and measurements of intracellular Ca^{2+} concentration in cane toad twitch fibres in the presence of 2,3-butanedione monoxime. **80**, 543, 1995
The effect of mechanical loading on the response of rat ventricular myocytes to acidosis. **80**, 701, 1995
The voltage dependence of contraction at different stimulation rates in guinea-pig ventricular myocytes. **80**, 941, 1995
Corticosterone
Effect of oral corticosterone administration on locomotor development of neonatal and juvenile rats. **80**, 469, 1995
Cortisol
The glucogenic capacity of the fetal pig: developmental regulation by cortisol. **80**, 457, 1995
Sympathoadrenal and other endocrine and metabolic responses to hypoglycaemia in the fetal foal during late gestation. **80**, 651, 1995
Creatine kinase
The effects of MM-creatine kinase deficiency on sustained force production of mouse fast skeletal muscle. **80**, 491, 1995
Cyclic AMP
Penetration of small molecular weight substances through cultured bovine brain capillary endothelial cell monolayers: the early effects of cyclic adenosine 3′,5′-monophosphate. **80**, 675, 1995
Cyclo-oxygenase
Cyclo-oxygenase mediation of endotoxin-induced fever, anterior and posterior pituitary hormone release, and hypothalamic c-Fos expression in the prepubertal pig. **80**, 663, 1995
Deglutition
Recognition of a pharyngo-oesophageal inhibitory reflex in dogs and its role in deglutition. **80**, 249, 1995
Dehydration
Responses to reduced water intake, including dehydration natriuresis, in sheep excreting sodium predominantly in urine or in faeces. **80**, 265, 1995
Denervation
Ca^{2+} release channels in rat denervated skeletal muscles. **80**, 561, 1995
Development
Development of the normal and hypertensive pulmonary vasculature. **80**, 843, 1995
Nutrition, temperature and homeostasis during perinatal development. **80**, 907, 1995
Diabetic retinopathy
The effect of experimental hypertension on retinal vascular autoregulation in humans: a mechanism for the progression of diabetic retinopathy. **80**, 53, 1995
Effect of an aldose reductase inhibitor, SNK-860, on deficits in the electroretinogram of diabetic rats. **80**, 981, 1995
Dopamine
Properties of an identified dopamine-containing neurone in culture from the snail *Helisoma*. **80**, 37, 1995
Depression of ventilation by dopamine in cats: effects of bilateral cervical sympathetic and vagal trunk section. **80**, 255, 1995
Electroretinogram
Effect of an aldose reductase inhibitor, SNK-860, on deficits in the electroretinogram of diabetic rats. **80**, 981, 1995
Endothelin
Ca^{2+}-activated Cl^- and K^+ channels and their modulation by endothelin-1 in rat pulmonary arterial smooth muscle cells. **80**, 815, 1995
Endothelium
The role of the endothelium in hypoxic pulmonary vasoconstriction. **80**, 793, 1995
Lung disease and pulmonary endothelial nitric oxide. **80**, 855, 1995
Endothelium-derived relaxing factor (EDRF)
Nitric oxide synthases in vascular cells. **80**, 885, 1995
Endotoxic shock
Glibenclamide, a blocker of ATP-sensitive potassium channels, reverses endotoxin-induced hypotension in pig. **80**, 167, 1995
Enterocyte
Intracellular pH regulation in chicken enterocytes: the importance of extracellular pH. **80**, 1001, 1995
Epidermal growth factor
Epidermal growth factor stimulates the restitution of rat gastric mucosa *in vitro*. **80**, 1009, 1995
Excretion
Responses to reduced water intake, including dehydration natriuresis, in sheep excreting sodium predominantly in urine or in faeces. **80**, 265, 1995
Facilitation
Activity-induced facilitation of L-type Ca^{2+} current in cardiomyocytes isolated from guinea-pig ventricles. **80**, 391, 1995
Fatigue
The effects of MM-creatine kinase deficiency on sustained force production of mouse fast skeletal muscle. **80**, 491, 1995
Muscle cell function during prolonged activity: cellular mechanisms of fatigue. **80**, 497, 1995
The effects of glibenclamide on tetanic force and intracellular calcium in normal and fatigued mouse skeletal muscle. **80**, 529, 1995
Fatty acid
Swelling-activated conductances for chloride, potassium and amino acids in the rat colon: a whole-cell study. **80**, 411, 1995
Feeding
The cardiovascular responses to feeding in man. **80**, 683, 1995
Fetal cardiac function
Effects of ductus arteriosus occlusion on pulmonary artery pressure during *in utero* ventilation in fetal sheep. **80**, 129, 1995
Fetus
Effect of central adenosine on brainstem blood flow in fetal sheep. **80**, 141, 1995

Haemodynamic responses to an angiotensin II receptor antagonist (GR117289) in maternal and fetal sheep. **80**, 285, 1995
EB 1089, a calcitriol analogue, decreases fetal calcium content when injected into pregnant rats. **80**, 449, 1995
The glucogenic capacity of the fetal pig: developmental regulation by cortisol. **80**, 457, 1995
Cardiovascular responses to heat stress in late gestation fetal sheep. **80**, 755, 1995
Impact of gestational age on the catecholamine responses of the fetal sheep adrenal to cholinergic stimulation *in vitro*. **80**, 767, 1995
Nutrition, temperature and homeostasis during perinatal development. **80**, 907, 1995

Fever
Cyclo-oxygenase mediation of endotoxin-induced fever, anterior and posterior pituitary hormone release, and hypothalamic c-Fos expression in the prepubertal pig. **80**, 663, 1995

Fish
The action of muscles in swimming fish. **80**, 177, 1995
Effects of a temperature increase on oxygen consumption of yellow freshwater eels exposed to high hydrostatic pressure. **80**, 1039, 1995

Functional hyperaemia
The effect of N^G-nitro-L-arginine methyl ester upon hindlimb blood flow responses to muscle contraction in the anaesthetized cat. **80**, 237, 1995

Fura-2
Regional differences in the contractile and intracellular Ca^{2+} responses of the guinea-pig vas deferens to neurotransmitters and excess K^+. **80**, 721, 1995

G protein
The G. L. Brown Prize Lecture. Voltage-dependent calcium channels and their modulation by neurotransmitters and G proteins. **80**, 1, 1995

Gastric acid
Vaginal birth *versus* elective Caesarian section: effects on gastric function in the neonate. **80**, 147, 1995

Gastric emptying
Control of gastric emptying in the pig: influence of cholecystokinin, somatostatin and prokinetic agents. **80**, 159, 1995

Gastric metabolism
Interactions between oxoglutarate oxidation and acid secretion in isolated rabbit gastric glands. **80**, 441, 1995

Gastrin
Vaginal birth *versus* elective Caesarian section: effects on gastric function in the neonate. **80**, 147, 1995

Glial cell
Chloride current activated by hypotonicity in cultured human astrocytoma cells. **80**, 373, 1995

Glibenclamide
Glibenclamide, a blocker of ATP-sensitive potassium channels, reverses endotoxin-induced hypotension in pig. **80**, 167, 1995
The effects of glibenclamide on tetanic force and intracellular calcium in normal and fatigued mouse skeletal muscle. **80**, 529, 1995

Glucogenesis
The glucogenic capacity of the fetal pig: developmental regulation by cortisol. **80**, 457, 1995

Glutamate
Glutamate-immunoreactivity in identified vagal afferent terminals of the cat: a study combining horseradish peroxidase tracing and postembedding electron microscopic immunogold staining. **80**, 193, 1995

Growth hormone
Selective transport of microparticles across Peyer's patch follicle-associated M cells from mice and rats. **80**, 735, 1995

Haemorrhage
A micropuncture study of the renal response to haemorrhage in rats: assessment of the role of vasopressin. **80**, 619, 1995

Heart
Biphasic L-arginine uptake by the isolated guinea-pig heart. **80**, 969, 1995

Heart rate
The effect of raised hydrostatic pressure on heart rate variability during breath holding in man. **80**, 881, 1995

Human
The cardiovascular responses to feeding in man. **80**, 683, 1995
The effect of raised hydrostatic pressure on heart rate variability during breath holding in man. **80**, 881, 1995

Hydraulic permeability
The measurement of permeability in single rat venules using the red cell microperfusion technique. **80**, 359, 1995

Hyperbaric physiology
The effect of raised hydrostatic pressure on heart rate variability during breath holding in man. **80**, 881, 1995

Hypertension
The effect of experimental hypertension on retinal vascular autoregulation in humans: a mechanism for the progression of diabetic retinopathy. **80**, 53, 1995
The mechanism of relaxation in response to magnesium by the aorta of pregnant rats with salt-induced hypertension. **80**, 79, 1995
Development of the normal and hypertensive pulmonary vasculature. **80**, 843, 1995

Hyperthermia
Cardiovascular responses to heat stress in late gestation fetal sheep. **80**, 755, 1995

Hypoglycaemia
Sympathoadrenal and other endocrine and metabolic responses to hypoglycaemia in the fetal foal during late gestation. **80**, 651, 1995

Hypotonicity
Chloride current activated by hypotonicity in cultured human astrocytoma cells. **80**, 373, 1995

Hypoxia
The role of the endothelium in hypoxic pulmonary vasoconstriction. **80**, 793, 1995

Hypoxic and metabolic regulation of voltage-gated K^+ channels in rat pulmonary artery smooth muscle cells. **80**, 803, 1995
Redox agents as a link between hypoxia and the responses of ionic channels in rabbit pulmonary vascular smooth muscle. **80**, 835, 1995
Clinical aspects of hypoxic pulmonary vasoconstriction. **80**, 865, 1995

Hypoxic pulmonary vasoconstriction
Clinical aspects of hypoxic pulmonary vasoconstriction. **80**, 865, 1995

Immunohistochemistry
Glutamate-immunoreactivity in identified vagal afferent terminals of the cat: a study combining horseradish peroxidase tracing and postembedding electron microscopic immunogold staining. **80**, 193, 1995

***In utero* ventilation**
Effects of ductus arteriosus occlusion on pulmonary artery pressure during *in utero* ventilation in fetal sheep. **80**, 129, 1995

Inflammation
Comparison of synovial fluid P_{O_2} and the sympathetic vasoconstrictor responses in normal and acutely inflamed rabbit knee joints. **80**, 209, 1995

Insulin
Insulin stimulates cationic amino acid transport activity in the isolated perfused rat pancreas. **80**, 745, 1995

Interstitial fluid
Composition and viscosity of interstitial fluid of rabbits. **80**, 203, 1995

Intestine
Selective transport of microparticles across Peyer's patch follicle-associated M cells from mice and rats. **80**, 735, 1995

Intracellular calcium
Muscle cell function during prolonged activity: cellular mechanisms of fatigue. **80**, 497, 1995
Contractile activation and measurements of intracellular Ca^{2+} concentration in cane toad twitch fibres in the presence of 2,3-butanedione monoxime. **80**, 543, 1995

Jaw
The effects of attentional factors on an inhibitory jaw reflex in man. **80**, 299, 1995

Joint
Neuropeptidergic and autonomic control of the vasculature of the rat knee joint revealed by laser Doppler perfusion imaging. **80**, 341, 1995
Prolonged alteration of vasoconstrictor and vasodilator responses in rat knee joints by adjuvant monoarthritis. **80**, 349, 1995

Kallikrein
Influences of secretory activities in rat submandibular glands on tissue kallikrein circulating in the blood. **80**, 429, 1995

Kidney
Resistance to glomerular injury in the diabetic BioBreeding rat. **80**, 991, 1995

Lactate
Skeletal muscle buffer value, fibre type distribution and high intensity exercise performance in man. **80**, 89, 1995

Laser Doppler imaging
Neuropeptidergic and autonomic control of the vasculature of the rat knee joint revealed by laser Doppler perfusion imaging. **80**, 341, 1995

Locomotor development
Effect of oral corticosterone administration on locomotor development of neonatal and juvenile rats. **80**, 469, 1995

Lung
Lung disease and pulmonary endothelial nitric oxide. **80**, 855, 1995

Mammary gland
The effects of relaxin on the response of intramammary pressure and mammary blood flow to exogenous oxytocin in the goat. **80**, 1047, 1995

Mechano-electrical coupling
Influence of stretch on excitation threshold of single frog ventricular cells. **80**, 221, 1995

Metabolism
Environmental effects on thermoregulation and breathing patterns during early postnatal development in hand-reared lambs. **80**, 779, 1995

Microvascular permeability
The measurement of permeability in single rat venules using the red cell microperfusion technique. **80**, 359, 1995
Cerebral microvascular permeability and CSF pH in anaesthetized rats. **80**, 1053, 1995

Milk ejection
The effects of relaxin on the response of intramammary pressure and mammary blood flow to exogenous oxytocin in the goat. **80**, 1047, 1995

Mole-rat
Intestinal calcium transport in mole-rats (*Cryptomys damarensis* and *Heterocephalus glaber*) is independent of both genomic and non-genomic vitamin D mediation. **80**, 597, 1995

Morphine
Opioid tolerance and dependence in the magnocellular oxytocin system: a physiological mechanism? **80**, 307, 1995

Motor unit
Changes in tension of slow motor units in rat medial gastrocnemius during constant-rate stimulation at different frequencies. **80**, 959, 1995

Mucosa
Epidermal growth factor stimulates the restitution of rat gastric mucosa *in vitro*. **80**, 1009, 1995

Muscle
Force responses to controlled stretches of electrically stimulated human muscle–tendon complex. **80**, 477, 1995
The effects of MM-creatine kinase deficiency on sustained force production of mouse fast skeletal muscle. **80**, 491, 1995
Muscle cell function during prolonged activity: cellular mechanisms of fatigue. **80**, 497, 1995

Muscle fatigue
Skeletal muscle buffer value, fibre type distribution and high intensity exercise performance in man. **80**, 89, 1995

Muscle fibre
Skeletal muscle buffer value, fibre type distribution and high intensity exercise performance in man. **80**, 89, 1995

Muscle tension
Changes in tension of slow motor units in rat medial gastrocnemius during constant-rate stimulation at different frequencies. **80**, 959, 1995

Natriuresis
Responses to reduced water intake, including dehydration natriuresis, in sheep excreting sodium predominantly in urine or in faeces. **80**, 265, 1995

Neonate
Vaginal birth *versus* elective Caesarian section: effects on gastric function in the neonate. **80**, 147, 1995
Effect of oral corticosterone administration on locomotor development of neonatal and juvenile rats. **80**, 469, 1995
Cold-induced changes in circulating levels of catecholamines and thyroid hormones are modulated by energy intake in newborn pigs. **80**, 877, 1995
Nutrition, temperature and homeostasis during perinatal development. **80**, 907, 1995

Nephropathy
Resistance to glomerular injury in the diabetic BioBreeding rat. **80**, 991, 1995

Neurohypophysis
Opioid tolerance and dependence in the magnocellular oxytocin system: a physiological mechanism? **80**, 307, 1995

Neurotransmitter
The G. L. Brown Prize Lecture. Voltage-dependent calcium channels and their modulation by neurotransmitters and G proteins. **80**, 1, 1995

Nitric oxide
The effect of N^G-nitro-L-arginine methyl ester upon hindlimb blood flow responses to muscle contraction in the anaesthetized cat. **80**, 237, 1995
The endothelial and non-endothelial mechanism responsible for attenuated vasoconstriction in cirrhotic rats. **80**, 609, 1995
Lung disease and pulmonary endothelial nitric oxide. **80**, 855, 1995
Biphasic L-arginine uptake by the isolated guinea-pig heart. **80**, 969, 1995
The role of nitric oxide in the control of protein secretion in the submandibular gland of the cat. **80**, 1019, 1995

Nitric oxide synthase
Nitric oxide synthases in vascular cells. **80**, 885, 1995

Noradrenaline
Regional differences in the contractile and intracellular Ca^{2+} responses of the guinea-pig vas deferens to neurotransmitters and excess K^+. **80**, 721, 1995

Nucleus tractus solitarii
Glutamate-immunoreactivity in identified vagal afferent terminals of the cat: a study combining horseradish peroxidase tracing and postembedding electron microscopic immunogold staining. **80**, 193, 1995

Oesophagus
Recognition of a pharyngo-oesophageal inhibitory reflex in dogs and its role in deglutition. **80**, 249, 1995

Osteoclast
Effect of calcitonin, elevated calcium and extracellular matrices on superoxide anion production by rat osteoclasts. **80**, 713, 1995

Oxygen
Comparison of synovial fluid P_{O_2} and the sympathetic vasoconstrictor responses in normal and acutely inflamed rabbit knee joints. **80**, 209, 1995

Oxytocin
Opioid tolerance and dependence in the magnocellular oxytocin system: a physiological mechanism? **80**, 307, 1995

Pancreas
Insulin stimulates cationic amino acid transport activity in the isolated perfused rat pancreas. **80**, 745, 1995
Rat pancreas after long-term treatment with the somatostatin analogue octreotide. **80**, 1031, 1995

Parathyroid hormone-related protein
EB 1089, a calcitriol analogue, decreases fetal calcium content when injected into pregnant rats. **80**, 449, 1995
The secretion of parathyroid hormone-related protein in the saliva of sheep and its effects on the salivary clearance of phosphate, calcium, magnesium, potassium and sodium ions. **80**, 589, 1995

Parietal cell
Interactions between oxoglutarate oxidation and acid secretion in isolated rabbit gastric glands. **80**, 441, 1995

Parturition
Effects of ductus arteriosus occlusion on pulmonary artery pressure during *in utero* ventilation in fetal sheep. **80**, 129, 1995

Permeability
Penetration of small molecular weight substances through cultured bovine brain capillary endothelial cell monolayers: the early effects of cyclic adenosine 3′,5′-monophosphate. **80**, 675, 1995

pH
Contribution of extracellular calcium to intracellular pH-induced changes in spontaneous force of rat portal vein. **80**, 69, 1995
Intracellular pH regulation in chicken enterocytes: the importance of extracellular pH. **80**, 1001, 1995

Pharynx
Recognition of a pharyngo-oesophageal inhibitory reflex in dogs and its role in deglutition. **80**, 249, 1995

Phosphate
The secretion of parathyroid hormone-related protein in the saliva of sheep and its effects on the salivary clearance of phosphate, calcium, magnesium, potassium and sodium ions. **80**, 589, 1995
Pituitary gland
Cyclo-oxygenase mediation of endotoxin-induced fever, anterior and posterior pituitary hormone release, and hypothalamic c-Fos expression in the prepubertal pig. **80**, 663, 1995
Potassium channel
Hypoxic and metabolic regulation of voltage-gated K^+ channels in rat pulmonary artery smooth muscle cells. **80**, 803, 1995
Opposing effects of oxidants and antioxidants on K^+ channel activity and tone in rat vascular tissue. **80**, 825, 1995
Pregnancy
The mechanism of relaxation in response to magnesium by the aorta of pregnant rats with salt-induced hypertension. **80**, 79, 1995
The effects of pregnancy and parturition on the substance P content of the rat uterus: uterine growth is accompanied by hypertrophy of its afferent innervation. **80**, 645, 1995
Pressure
Effects of a temperature increase on oxygen consumption of yellow freshwater eels exposed to high hydrostatic pressure. **80**, 1039, 1995
Prize Lecture
The G. L. Brown Prize Lecture. Voltage-dependent calcium channels and their modulation by neurotransmitters and G proteins. **80**, 1, 1995
Protein
The role of nitric oxide in the control of protein secretion in the submandibular gland of the cat. **80**, 1019, 1995
Pulmonary artery
The role of the endothelium in hypoxic pulmonary vasoconstriction. **80**, 793, 1995
Pulmonary circulation
Hypoxic and metabolic regulation of voltage-gated K^+ channels in rat pulmonary artery smooth muscle cells. **80**, 803, 1995
Development of the normal and hypertensive pulmonary vasculature. **80**, 843, 1995
Clinical aspects of hypoxic pulmonary vasoconstriction. **80**, 865, 1995
Pulmonary vasculature
Redox agents as a link between hypoxia and the responses of ionic channels in rabbit pulmonary vascular smooth muscle. **80**, 835, 1995
Rapid Communications
Glibenclamide, a blocker of ATP-sensitive potassium channels, reverses endotoxin-induced hypotension in pig. **80**, 167, 1995
The effects of MM-creatine kinase deficiency on sustained force production of mouse fast skeletal muscle. **80**, 491, 1995
Penetration of small molecular weight substances through cultured bovine brain capillary endothelial cell monolayers: the early effects of cyclic adenosine 3′,5′-monophosphate. **80**, 675, 1995
Cold-induced changes in circulating levels of catecholamines and thyroid hormones are modulated by energy intake in newborn pigs. **80**, 877, 1995
The effect of raised hydrostatic pressure on heart rate variability during breath holding in man. **80**, 881, 1995
Cerebral microvascular permeability and CSF pH in anaesthetized rats. **80**, 1053, 1995
Redox agent
Opposing effects of oxidants and antioxidants on K^+ channel activity and tone in rat vascular tissue. **80**, 825, 1995
Redox agents as a link between hypoxia and the responses of ionic channels in rabbit pulmonary vascular smooth muscle. **80**, 835, 1995
Reflection coefficient
The measurement of permeability in single rat venules using the red cell microperfusion technique. **80**, 359, 1995
Reflex
The effects of attentional factors on an inhibitory jaw reflex in man. **80**, 299, 1995
Relaxin
The effects of relaxin on the response of intramammary pressure and mammary blood flow to exogenous oxytocin in the goat. **80**, 1047, 1995
Renal function
A micropuncture study of the renal response to haemorrhage in rats: assessment of the role of vasopressin. **80**, 619, 1995
Primary neural involvement in renal haemodynamic and functional responses to prolonged stimulation of atrial receptors in anaesthetized dogs. **80**, 631, 1995
Renal nerve
Primary neural involvement in renal haemodynamic and functional responses to prolonged stimulation of atrial receptors in anaesthetized dogs. **80**, 631, 1995
Respiratory excitation
Reflex respiratory responses to continuous and intermittent stimulation of afferent fibres from muscles in cats. **80**, 103, 1995
Respiratory inhibition
Reflex respiratory responses to continuous and intermittent stimulation of afferent fibres from muscles in cats. **80**, 103, 1995
Review Articles
The action of muscles in swimming fish. **80**, 177, 1995
Opioid tolerance and dependence in the magnocellular oxytocin system: a physiological mechanism? **80**, 307, 1995
Muscle cell function during prolonged activity: cellular mechanisms of fatigue. **80**, 497, 1995
The cardiovascular responses to feeding in man. **80**, 683, 1995
Nitric oxide synthases in vascular cells. **80**, 885, 1995
Nutrition, temperature and homeostasis during perinatal development. **80**, 907, 1995
SNK-860
Effect of an aldose reductase inhibitor, SNK-860, on deficits in the electroretinogram of diabetic rats. **80**, 981, 1995

Saliva
The secretion of parathyroid hormone-related protein in the saliva of sheep and its effects on the salivary clearance of phosphate, calcium, magnesium, potassium and sodium ions. **80**, 589, 1995
The role of nitric oxide in the control of protein secretion in the submandibular gland of the cat. **80**, 1019, 1995
Salivary gland
Influences of secretory activities in rat submandibular glands on tissue kallikrein circulating in the blood. **80**, 429, 1995
Secretion
Influences of secretory activities in rat submandibular glands on tissue kallikrein circulating in the blood. **80**, 429, 1995
Skeletal muscle
The action of muscles in swimming fish. **80**, 177, 1995
The effect of N^G-nitro-L-arginine methyl ester upon hindlimb blood flow responses to muscle contraction in the anaesthetized cat. **80**, 237, 1995
The effects of glibenclamide on tetanic force and intracellular calcium in normal and fatigued mouse skeletal muscle. **80**, 529, 1995
Contractile activation and measurements of intracellular Ca^{2+} concentration in cane toad twitch fibres in the presence of 2,3-butanedione monoxime. **80**, 543, 1995
Ca^{2+} release channels in rat denervated skeletal muscles. **80**, 561, 1995
Smooth muscle
Contribution of extracellular calcium to intracellular pH-induced changes in spontaneous force of rat portal vein. **80**, 69, 1995
Muscarinic suppression of Ca^{2+} current in smooth muscle cells of the guinea-pig urinary bladder. **80**, 575, 1995
Regional differences in the contractile and intracellular Ca^{2+} responses of the guinea-pig vas deferens to neurotransmitters and excess K^+. **80**, 721, 1995
Snail neurone
Properties of an identified dopamine-containing neurone in culture from the snail *Helisoma*. **80**, 37, 1995
Sodium–calcium exchange
The voltage dependence of contraction at different stimulation rates in guinea-pig ventricular myocytes. **80**, 941, 1995
Somatostatin
Control of gastric emptying in the pig: influence of cholecystokinin, somatostatin and prokinetic agents. **80**, 159, 1995
Rat pancreas after long-term treatment with the somatostatin analogue octreotide. **80**, 1031, 1995
Stimulation frequency
Activity-induced facilitation of L-type Ca^{2+} current in cardiomyocytes isolated from guinea-pig ventricles. **80**, 391, 1995
Changes in tension of slow motor units in rat medial gastrocnemius during constant-rate stimulation at different frequencies. **80**, 959, 1995
Stomach
Epidermal growth factor stimulates the restitution of rat gastric mucosa *in vitro*. **80**, 1009, 1995
Stretch
Influence of stretch on excitation threshold of single frog ventricular cells. **80**, 221, 1995
Force responses to controlled stretches of electrically stimulated human muscle–tendon complex. **80**, 477, 1995
Substance P
The effects of pregnancy and parturition on the substance P content of the rat uterus: uterine growth is accompanied by hypertrophy of its afferent innervation. **80**, 645, 1995
Superoxide anion
Effect of calcitonin, elevated calcium and extracellular matrices on superoxide anion production by rat osteoclasts. **80**, 713, 1995
Swimming
The action of muscles in swimming fish. **80**, 177, 1995
Symposium Papers
The role of the endothelium in hypoxic pulmonary vasoconstriction. **80**, 793, 1995
Hypoxic and metabolic regulation of voltage-gated K^+ channels in rat pulmonary artery smooth muscle cells. **80**, 803, 1995
Ca^{2+}-activated Cl^- and K^+ channels and their modulation by endothelin-1 in rat pulmonary arterial smooth muscle cells. **80**, 815, 1995
Opposing effects of oxidants and antioxidants on K^+ channel activity and tone in rat vascular tissue. **80**, 825, 1995
Redox agents as a link between hypoxia and the responses of ionic channels in rabbit pulmonary vascular smooth muscle. **80**, 835, 1995
Development of the normal and hypertensive pulmonary vasculature. **80**, 843, 1995
Lung disease and pulmonary endothelial nitric oxide. **80**, 855, 1995
Clinical aspects of hypoxic pulmonary vasoconstriction. **80**, 865, 1995
Synovial fluid
Comparison of synovial fluid P_{O_2} and the sympathetic vasoconstrictor responses in normal and acutely inflamed rabbit knee joints. **80**, 209, 1995
Temperature
Effects of a temperature increase on oxygen consumption of yellow freshwater eels exposed to high hydrostatic pressure. **80**, 1039, 1995
Tendon
Force responses to controlled stretches of electrically stimulated human muscle–tendon complex. **80**, 477, 1995
Thermoregulation
Environmental effects on thermoregulation and breathing patterns during early postnatal development in hand-reared lambs. **80**, 779, 1995
Thyroid hormone
Environmental effects on thermoregulation and breathing patterns during early postnatal development in hand-reared lambs. **80**, 779, 1995

Cold-induced changes in circulating levels of catecholamines and thyroid hormones are modulated by energy intake in newborn pigs. **80**, 877, 1995

Transport

Selective transport of microparticles across Peyer's patch follicle-associated M cells from mice and rats. **80**, 735, 1995

Vagotomy

Depression of ventilation by dopamine in cats: effects of bilateral cervical sympathetic and vagal trunk section. **80**, 255, 1995

Vascular tone

Opposing effects of oxidants and antioxidants on K^+ channel activity and tone in rat vascular tissue. **80**, 825, 1995

Vasoconstriction

The endothelial and non-endothelial mechanism responsible for attenuated vasoconstriction in cirrhotic rats. **80**, 609, 1995

Vasodilatation

Nitric oxide synthases in vascular cells. **80**, 885, 1995

Vasopressin

Renal, endocrine and vascular effects of atrial natriuretic peptide in a novel vasopressin-deficient genetically hypertensive strain of rat. **80**, 275, 1995

A micropuncture study of the renal response to haemorrhage in rats: assessment of the role of vasopressin. **80**, 619, 1995

Ventilation

Depression of ventilation by dopamine in cats: effects of bilateral cervical sympathetic and vagal trunk section. **80**, 255, 1995

Visceral innervation

The effects of pregnancy and parturition on the substance P content of the rat uterus: uterine growth is accompanied by hypertrophy of its afferent innervation. **80**, 645, 1995

Vitamin D

Intestinal calcium transport in mole-rats (*Cryptomys damarensis* and *Heterocephalus glaber*) is independent of both genomic and non-genomic vitamin D mediation. **80**, 597, 1995

Volume regulation

Swelling-activated conductances for chloride, potassium and amino acids in the rat colon: a whole-cell study. **80**, 411, 1995
